

# Horse Trails and Tales

Eleanor Kellon, VMD

6/28/2011

Edition 1, Volume 5

## *The Horse's Mouth*

### *-Just the Facts*

The only horse publication where you, the reader, gets to direct the content. Each month there will be 2 full length feature articles, one on a topic of interest to all horse owners and trainers, the other focusing on a health, soundness or performance issue. Interesting and informative case or farm/herd histories will be included. Important news items will also be covered.

Instead of the usual "letter to the editor" option, all subscribers will have immediate access to a message board where they can post questions at any time, on any topic, and be answered quickly. If a question requires an in-depth answer, it will be turned into a feature article. Subscribers may also suggest topics for articles and all subscribers will be given the opportunity to express their interest in those suggestions to determine which will appear first.

The goal at all times will be to provide you with factual information to make horsekeeping more efficient, successful and affordable, whether you have a backyard friend or a high performance horse. No hype. No advertising. No conflicting interests.

#### Article Topics:

The Many Faces of Lyme Disease

The Physiological Trim

Demystifying Detoxification

The Many Uses of Acetyl-L-Carnitine
